

5 fun facts about electric buses

1.

Eco-Friendly: At First Bus, our electric buses are part of our big plan to protect the environment. They help reduce pollution and make our world a cleaner place.

2.

Quiet Rides: Electric buses are really quiet! They don't make loud engine noises like regular buses. That means you can talk to your friends on our zero emission buses without shouting.

3.

Cleaner Air: Electric buses help keep the air clean because they don't have exhaust pipes that put out smoke. This is important because clean air is good for human health.

4.

Charging Time: When electric buses need more power, they plug in to get charged, just like when you charge a phone!

5.

No Fuel Needed: Electric buses don't use nasty fuel. Instead, they run on electricity, which is a lot like the power that makes your lights and TV work.
